

## Internship Announcement

### **Suaahara II MER Intern- Adolescent Panel (Kathmandu, Nepal)**

Established in 1915 with Helen Keller as a founding trustee, Helen Keller International (HKI) is dedicated to saving the sight and lives of the most vulnerable and disadvantaged. Headquartered in New York City, HKI currently conducts programs in 21 countries in Africa and Asia, as well as in the United States. Renowned for its reliability, efficiency and high level of technical expertise, HKI promotes the development of sustainable, large-scale programs that deliver effective preventative and curative services for nutrition, eye health and neglected tropical diseases. Each year, HKI hosts student interns to engage in substantive projects in our country and regional offices.

#### **Background**

USAID-funded Suaahara II (SII) is a five-year, \$63 million integrated program dedicated to improving the health and nutrition of children and mothers of children who fall within the 1000 days period, i.e. from conception until a child reaches 24 months of age. This period is recognized as a crucial timeframe during which nutritional interventions can have optimal impact on child growth and development. SII was designed in consultation with the Government of Nepal GON and other stakeholders and will contribute towards achieving the goals set by Nepal's Multi-Sector Nutrition Plan (MSNP). In 42 of Nepal's 77 districts, Suaahara II will support the GON with a district-wide approach to expanding health and nutrition services, but SII also works at the household and community level in a multi-sectoral way particularly on health and nutrition behaviors, family planning, water, sanitation, and hygiene (WASH) including menstrual hygiene, food security and dietary diversity, agriculture/homestead food production (HFP), governance, and gender equity and social issues. In addition to working with mother/child dyads in the 1000-day period, SII has a household approach to reach all household members including fathers and grandmothers of young children; SII has also started various programmatic activities targeted to adolescents (10-19 years), as this is another window of opportunity increasingly recognized as important for nutrition and growth.

#### **Scope of Work**

This internship will involve analysis, interpretation, and use of data from the three rounds of adolescent panel data from Suaahara II, a large-scale, multi-sectoral nutrition program in Nepal. The third annual adolescent panel involves data collection among adolescents who were 10-19 years of age in the first year of data collection (2017) when they were randomly selected and are now being followed as a cohort.

Cleaning and analysis do files need to be updated and a report prepared to share key findings. Do files should reflect revisions (adding and removing questions) made to the survey tools each year and the reporting from year 1 will need to be updated. Upon completion of descriptive analysis, additional topics of mutual interest between Suaahara II and the intern can be looked at within the datasets.

The anticipated plan, subject to change due to Suaahara needs evolving includes:

- Support data management, including updating cleaning and analysis do files; updating of dummy tables for results
- Finalization of analysis of files and descriptive analysis for results tables
- Finalization of all results tables based on team feedback; drafting and finalization of annual

survey report

- Additional analyses – disaggregated descriptive analyses, regression modelling, etc.

### Qualifications

- This position would be ideal for an MPH student seeking hands-on experience in program monitoring and evaluation.
- Experienced with data analysis, including an understanding of Stata
- Highly computer literate, particularly with Microsoft word and excel.
- Excellent oral and written English language skills, including the ability to clearly document work and write reports.
- Interest in writing up the findings for peer-review publication. Prior experience in publishing ideal.
- Ability to prioritize workload, assume responsibility for work, and follow through to completion.
- An ability to work in challenging and changing environments, and to see through challenges to find solutions.

### Terms & Conditions

- Full- or part-time between October 2019 and June 2020
- This internship will be based either in Kathmandu, working out of HKI's Suaahara office, or as a remote position (if data analysis skills are strong and intern is unable to travel).
- **Costs associated with Country Office Internships are the full responsibility of the participating intern, including airfare, housing, daily living expenses, etc.**
  - HKI will only reimburse costs associated with actual project work, such as travel to field projects.
- HKI/SII will enter into a data sharing agreement to allow SII data to be used for the purpose of the internship and to jointly publish the key findings for this agreed scope and nothing beyond this agreed scope, without explicit written permission and revision of the data sharing agreement.
- HKI SII's Senior Technical Advisor will be assigned as the academic mentor to ensure the intern is provided with sufficient academic guidance.
- In addition, an Administrative Manager will be assigned (this may or may not be the same person as the Academic Mentor) to welcome and support the intern with regards to logistics, to act as the local point of contact for all administrative information, and to serve as HQ's primary point of contact for the management of any emergencies that may arise.

### To Apply

Qualified candidates should submit a cover letter and resume to [hki.interns@hki.org](mailto:hki.interns@hki.org) noting the internship title and location in the subject line. Applications will be accepted until the position is filled.
